Why should you choose solar in Spain?

Discover life in Spain the way it should be: sunny, simple, and stress-free. Since 1999, Solar in Spain has been helping homeowners and businesses across the country harness the power of the sun. With over 5,000 successful installations and more than 25 years of experience, we are one of Spain's most trusted solar energy providers.

How much solar power does Spain have?

In 2008 the Spanish government committed to achieving a target of 12% of primary energy from renewable energy by 2010 and by 2020 expected the installed solar generating capacity of 10 GW. Since 2010, Spain has been the world's leader in concentrated solar power (CSP).

Does Spain have a solar resurgence?

“Self-generated energy soars in Spain as solar panels plunge in price”, El País, ISSN 1134-6582. Retrieved 5 July 2019. “Economics not tending driving Spain's solar resurgence”, PV Tech. 23 April 2018. Retrieved 11 July 2019. “Spain's bulging solar pipeline heaps pressure on permitting”, Reuters. 8 December 2022.

Where is solar power based in Spain?

The company currently operates 2.4GW of solar capacity, predominantly in southern Spain where solar resources are most abundant. Their integrated approach combines solar generation with storage solutions and smart grid technologies, creating more reliable and valuable renewable assets.

Solar traffic lights with LED technology for road and urban lighting. They are ecological ones that use solar lighting for a retroactive charge, obtaining a renewable energy.
