How much do solar panels cost in Saint John?

On average, solar panels in Saint John cost \$#.## per watt for an average installation cost of \$13,000 for a 5kW system. Depending on the solar installer you choose, the total solar panel installation cost can range plus or minus \$5,000 but the above is an average cost of a solar panel system.

Can a solar water pump be replaced?

Yes, but it can be complex. If your existing pump is an AC pump, you will need a large solar array, a battery bank, and a powerful inverter to run it. In most cases, it is more efficient and cost-effective to replace it with a purpose-built DC solar pump. The solar water pump is more than a product; it's a technology of empowerment.
