-----

In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project--a 10 MW photovoltaic ...

Swiss energy storage company Leclanch& #233; has broken ground on a US\$70 million solar and storage microgrid project in St Kitts and Nevis. The system will include a 35.7MW solar farm ...

What is the future of electricity in Saint Lucia? At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and ...

The Elora BESS will establish Battery Energy Storage Systems (BESS) in Wellington County - powering thousands of local homes and businesses and delivering 200 megawatts nameplate ...

Construction work will include the development of 10 MW of solar power along with an energy storage system with two-hour lithium ...

The project's unique design reflects Saint Lucia's ambition to transform its energy sector for a long-lasting positive impact on its people. The project is using public finance for geothermal ...

Kinetic/Flywheel energy storage systems (FESS) have re-emerged as a vital technology in many areas such as smart grid, renewable energy, electric vehicle, and high-power applications. ...

This article examines the specific energy challenges in Saint Lucia and makes the business case for integrating on-site solar and battery storage to ensure operational continuity ...

Lucia is embracing innovative energy storage solutions to stabilize its grid and accelerate renewable adoption.
