To optimally support the construction progress, INTILION organized a lithium-capable interim storage facility with the highest safety standards ...

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars.

In the Swiss town of Laufenburg, located at the intersection of the borders of Switzerland, Germany, and France, a groundbreaking energy project is taking shape: the ...

The solution proposed by the Ticino start-up is an electricity storage battery consisting of blocks of concrete that weigh 35 tonnes each and a six-arm crane with a novel ...

Flexbase Group has begun building what could become one of Europe's largest flow battery storage installations, breaking ground on an 800 MW/1.6 GWh redox flow system ...

To optimally support the construction progress, INTILION organized a lithium-capable interim storage facility with the highest safety standards near the project site. This made it possible to ...

The solution proposed by the Ticino start-up is an electricity storage battery consisting of blocks of concrete that weigh 35 tonnes ...

"This project helps to stabilize the electricity grid in Switzerland and to optimize the management of our own energy and power capacity in Wettingen", he states. Both projects ...

The project involves the construction of an energy storage facility with a power output of 800 MW and a capacity of 1600 MWh. These parameters are unmatched both in ...

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies ...

In Energy Vault's second deployment, it will supply Energie Wettingen, an independent public utility northwest of Zurich, with an 8 MW / 16 MWh B-VAULT FlexGrid ...

Flexbase Group has begun building what could become one of Europe's largest flow battery storage installations, breaking ground on ...
