Rapid solar capacity expansion overwhelms the grid, PV manufacturers compete for market shares, and then large target markets slap import tariffs on Chinese PV products, ...

The world's largest solar conference, SNEC PV Power Conference in Shanghai, recently spotlighted pressing challenges in ...

This vast output is complemented by continuous advancements in cost-effectiveness and technological efficiency, seen in developments like improved battery storage ...

REGlobal features analysis of key trends and major developments, interviews with top managers and officials, opinion of leading experts and a rich knowledge centre. It covers a ...

The world's largest solar conference, SNEC PV Power Conference in Shanghai, recently spotlighted pressing challenges in China's solar panel production. Against a backdrop ...

Across the continent, solar imports from China rose 50 percent the first 10 months of 2025, continuing a trend, according to a review of Chinese export data by Ember, a British ...

The China solar panel industry which commands 80% of global solar panel production capacity, is taking a bath, reports the Nikkei. Nine of the top producers are Chinese ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more ...

Driven by favorable factors such as the continued decline in PV power generation costs and growing demand
