While super white glass excels in transmitting visible light, its ultraviolet transmittance is relatively low. This characteristic allows for ...

Ultra white glass, as a packaging glass and electrode glass substrate for solar cells, plays a great role in photovoltaic power generation devices due to its high transmittance and high ...

While super white glass excels in transmitting visible light, its ultraviolet transmittance is relatively low. This characteristic allows for efficient solar energy absorption ...

Ultra-white calendered photovoltaic glass for solar photovoltaic modules is a low-iron glass with ultra-white cloth pattern (suede) embossing on the glass surface. After tempered coating, the ...

The superior light transmission properties of ultra-white glass compared to conventional solar glass enhance energy efficiency, making it a preferred choice for manufacturers. ...

Innovations such as nano-coatings and anti-reflective layers are enhancing performance while reducing costs, making ultra-white glass increasingly competitive.

Ultra-white calendered photovoltaic glass for solar photovoltaic modules is a kind of low-iron glass with ultra-white cloth (velvet) embossed surface, and the light transmittance can reach over ...

Our flagship product--transparent solar glass--combines cutting-edge technology with practical design. Made from double-sided ultra-white float glass, this solution is perfect for applications ...

Ultra-white embossed photovoltaic glass is witnessing surging demand due to its unique optical and functional properties tailored for high-efficiency solar energy systems.

Ultra-white glass for solar glass

Pilkington Optiwhite(TM) is a range of ultra-clear float low iron glass, which maximises the solar energy transmittance and, therefore, the efficiency of the photovoltaic modules.

With high light & energy transmission, easy processing, excellent durability and extremely low spontaneous breakage ratio perfectly combined, it is an ideal product aiming for solar application.

Pilkington Optiwhite(TM) is a range of ultra-clear float low iron glass, which maximises the solar energy transmittance and, therefore, the efficiency of ...
